Core Service Platform Use Cases

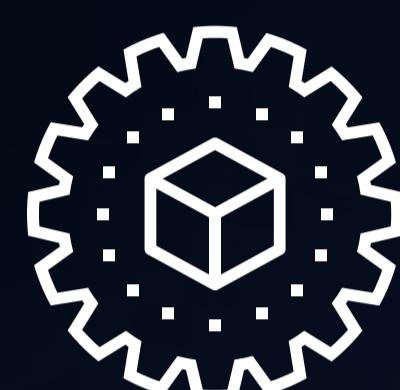

Stay informed of key milestones, events and engagement opportunities by subscribing to the DestinE community

destination-earth.eu

Demonstrating the value of Destination Earth through its Core Service Platform and tailoring its evolution on real user needs

Main Goals

Implement use cases to demonstrate the impact of the Destination Earth Service Platform (DESP) and DestinE infrastructure.

Engage with the community to co-design the DESP to ensure that it responds to real user needs.

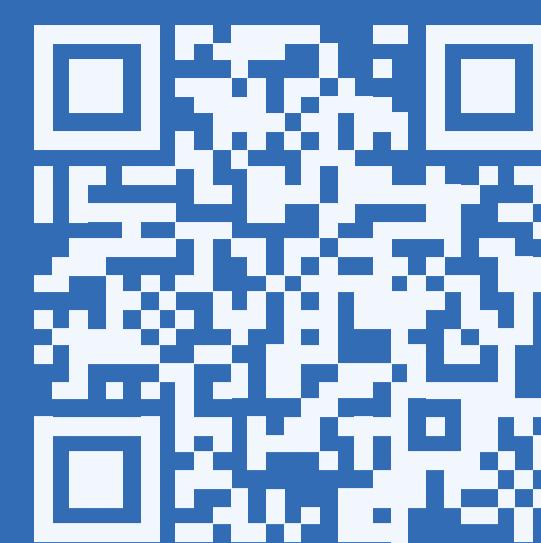

Use cases: fast facts

Selected through two rounds of ESA procurements.

Demonstrating DestinE and DESP added value in supporting EU climate change policy.

Diversity of applications related to the EU Green Deal and Digital Transformation programmes.

Agile and open source development using DESP services and DestinE specific data.

Stay informed of key milestones, events and engagement opportunities by subscribing to the DestinE community

destination-earth.eu

Why join the community?

Influence the development of the DESP and other DestinE components.

Learn about key updates and achieved milestones in the implementation of DestinE.

Be the first to know of early usage opportunities.

Where to start?

The DestinE Joint Website, maintained with the resources of the DEUC project, is the central hub for all DestinE-related information, news, opportunities and to interact with the initiative. It will feature:

- 🌐 Open calls for DestinE use cases.
- 🌐 Funded use cases.
- 🌐 User requirements gathering opportunities.
- 🌐 Access to datasets, tools and apps.
- 🌐 Information on the DestinE ecosystem of initiatives and projects
- 🌐 E-Learning platform.

Visit the website and make sure to join the DestinE community!
